Re: Shane McGovern, 20/5/1963

Dear ENT Department

I hope this letter finds you well. I am writing to refer Shane McGovern who has been experiencing

continuous nasal obstruction for about 4 months. There is a noted loss of taste and smell since

the onset. He reports general fatigue, no respiratory distress, No history of recent infections apart

from Covid 19 hospitalisation in 2021 December.

Past Medical History: T2DM, Atrial Fibrillation, HTN, Osteoporosis

Current Medications: Metformin 1g daily, Amlodipine 10mg daily, Bisoprolol 2mg Daily. Warfarin 3mg daily; Alendronic acid 70mg weekly.

Considering the potential impact on quality of life, I would greatly appreciate your evaluation and

advice on further management.

Warm regards,

Dr. Davis
